**Do you have over 15 damage claims per year?
Then Sunetplus is the right solution for your company.**

Claims and absence management with Sunetplus

Simplify claims, absence management and risk analysis in your company: with Sunetplus, transmit accident and illness claims quickly, easily and electronically to all associated insurers. Data is saved locally on your premises and you have extensive evaluation options.

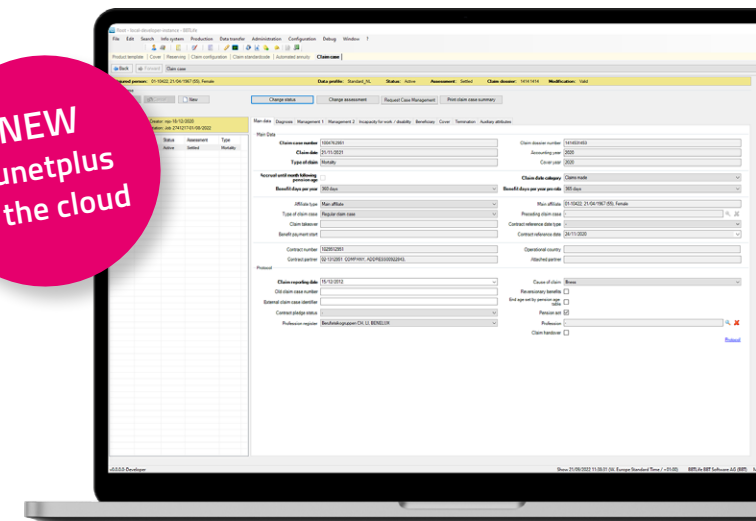

20 accident and illness insurers and over 13,000 companies have already chosen Sunetplus. No wonder: Sunetplus offers easy and secure claims handling with open interfaces to other systems.

Sunetplus – ideal for companies

You benefit from a wide variety of functions that can be individually and comprehensively configured to your company size. The most significant advantages for you include:

- Management of company data and insurance policies
- Comprehensive authorisation system
- Recording and management of HR and wage data
- Tracking of work incapacity timelines
- Electronic transmission of damages claims
- Creation of statistics and analyses
- Transmission of the insurer's claim number to the insured company
- BBTBidi: electronic transmission of the daily allowance and case status with selected insurers

**NEW
Sunetplus
in the cloud**

20 major insurers already trust Sunetplus with their business

Does your company already work with one of these insurers? Then Sunetplus is available to you at no charge.

Open interface to HR systems

Save yourself the hassle of time-consuming manual input: Sunetplus offers an open interface to external ERP systems, so importing all your employee data on a regular basis is easy.

Here's how to get started with Sunetplus

Quickly and easily install Sunetplus for your company: it's a matter of just a few clicks to download the program at bbtsoftware.ch (**Sunetplus support – BBT Software**). Sunetplus is available in multiple languages – select your desired language when the program starts up.

Sunetplus as SaaS in the cloud

Sunetplus is now also available as a cloud version, which offers many advantages. If you are interested in this version, our Sunetplus support team will be happy to provide you with comprehensive personal support.
